- Cost of Construction - The cost of all the construction portions of a project, generally based upon the sum of the construction contract(s) and other direct construction costs; this does not include the compensation paid to the engineer, architect and consultants or the cost of the land. The township has the final determination in accepting the submitted cost of construction as provided on the permit application and may at its discretion require evidence to support said proposed cost of construction.
- The multiplier is (.0055).
- This fee is for the building portion only. Additional fees for plumbing, mechanical, electrical and other improvements may apply.
- A private residential garage is a *Utility, miscellaneous* use.
- A \$15.00 per sf building value will be used for unfinished basements for all use groups.
- Deduct 20% for "shell only" buildings.
- N.P. = not permitted

EXAMPLE OF HOW TO CALCULATE A BUILDING PERMIT FEE

- This example assumes 1,800 sf of *Residential R-3, Construction Type 5-B*.
- \$112.65 X 1,800 square feet = \$202,770.00.
- \$202,770.00 X .0055 = \$1,115.24.
- For this example the permit fee is \$1,115.24 (plus the \$4 fee per Act 13 of 2004)
