

## **Unlicensed and Uninspected Vehicles**

West Bradford Township regulates the storage of unlicensed and uninspected vehicles. If you have a vehicle or trailer that is not currently licensed or inspected stored outside on your property or on a public street, you are violating Township ordinances. Many residents believe, incorrectly, that they are permitted to store one such vehicle.

The Township Zoning Ordinance and Property Maintenance Code do not permit vehicles or trailers of any type to be parked or stored on any residentially zoned property unless they are in a good state of repair and display current license and inspection stickers. This includes public streets and right-of-ways. However, these vehicles may be stored in a completely enclosed building approved for such use.

If you have an unlicensed and uninspected vehicle parked or stored outside on your property, please take the time to place the vehicle in your garage or have the vehicle properly inspected and licensed before it becomes a complaint. Your neighbors will appreciate it, our staff will appreciate it, and you will save yourself a fine.
