

Watershed Protection Tip
DON'T TOP OFF

“Topping off” a gas tank after the nozzle clicks can cost you money and pollute our streams. Overfilling causes gas spills that may drain to the storm sewer and nearby streams. And forcing extra gasoline into the tank can decrease engine efficiency and adversely affect the vehicle's emission system.

This Watershed Protection Tip is part of West Bradford Township's ongoing efforts to provide public education on stormwater management and the protection of our environment.
