Dear Valued Customer,

As diesel prices reached historic levels, you have experienced fuel surcharges being applied to your shipping charges. At Allan Myers Materials we have adjusted the starting point from our prior matrix to more reflect current fuel prices. This surcharge will be applied to all transportation services when the EIA ULSD Monthly Index reaches \$4.50 per gallon (or greater) in the Central Atlantic (PADD 1B) region. This monthly index is published the first Monday of each month and can be found at https://www.eia.gov/petroleum/gasdiesel/. It will continue to be charged at the established level, for all transportation services provided during the trailing month. The surcharge level will be reestablished monthly and remain in effect until the price per gallon drops below the \$4.50 per gallon threshold.
